

iActivos®

Intelligent maintenance management for
high-demand industries

iActivos® is a complete solution for scheduling, executing, and auditing preventive and corrective maintenance of critical assets. It is especially valuable for sectors like Oil & Gas, Mining, Public Utilities, Energy, and Logistics.

Core Capabilities:

Preventive and corrective plans: Schedule recurring tasks and track unexpected maintenance with full traceability.

Flexible monitoring: Track runtime hours, mileage, usage cycles, or any custom operational parameter.

Alerts: Receive alerts for due or upcoming maintenance based on time, condition, or usage.

Complete asset history: View all past maintenance, parts used, technicians involved, and observations.

Advanced reporting: Generate strategic reports to support decisions on availability, cost, and performance.

Benefits:

Fewer unplanned shutdowns

Extended asset lifespan

Inventory and parts optimization

Real-time visibility and compliance with standards

Trusted by:

- Oil & Gas drillers and rig operators
- Power plants and utility companies
- Heavy transport and machinery fleets
- Industrial and construction services
- Logistics and port operations
